- Ele irá aparecer na sua aba de websites.

The screenshot shows the MonsterASP.net dashboard. The top navigation bar includes the logo, a 'Create new service' button, and user information for 'Luna Beatriz'. The left sidebar contains various management options like Dashboard, Websites, Databases, E-mails, DNS, Tickets, Subscriptions, Billing, and Customer. The main content area is titled 'Websites' and displays a table of cloud websites. The table has columns for Status, Name, Domain aliases, Subscription, Plan, Region, Memory, and Disk usage. Two websites are listed: 'teste23.runasp.net' and 'apiestmovies.runasp.net', both on 'Free plan' and 'EU' region. Each row has a 'Manage' button, a 'Rename' button, and a 'Delete' button. A '+ Add Website' button is located at the top right of the table.

Status	Name	Domain aliases	Subscription	Plan	Region	Memory	Disk usage	
Enabled	teste23.runasp.net	0 [---]	Free plan	Free	EU	256 MB	0% 5120 MB	Manage Rename Delete
Enabled	apiestmovies.runasp.net	0 [---]	Free plan	Free	EU	256 MB	0% 5120 MB	Manage Rename Delete

- Depois de criar seu site, clique no botão **Manage**.

This screenshot is identical to the previous one, but with a red arrow pointing to the 'Manage' button for the 'teste23.runasp.net' website, highlighting the action to be taken.

- Essa tela irá aparecer, clique em **WebDeploy access**, e mude para Enabled e baixe o arquivo, apertando **Download publish profile**.

HELP How to publish website using WebDeploy from Visual Studio?

Quick actions: Start, Stop, Restart

- Ao clicar no botão, você vai baixar um arquivo **.publishSettings**.

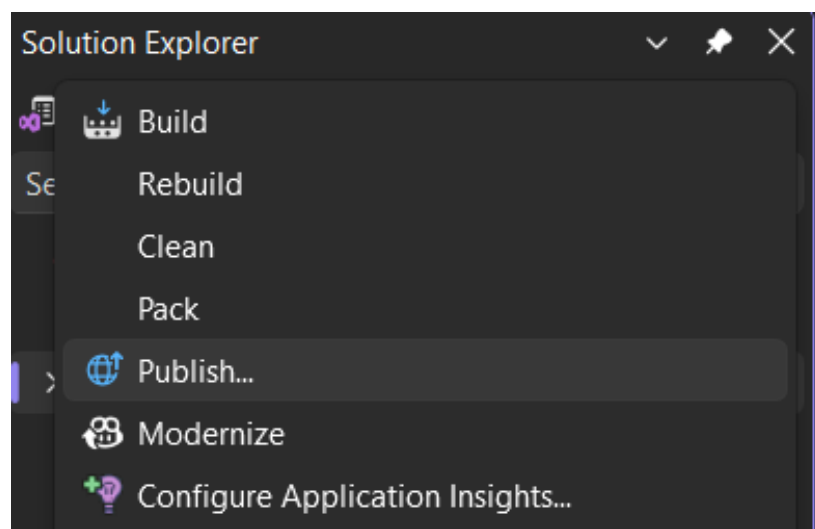

teste23.runasp.net-WebDeploy.publishSettings
Tipo: Arquivo PUBLISHSETTINGS

Passo 3: Utilizando a chave no Visual Studio.

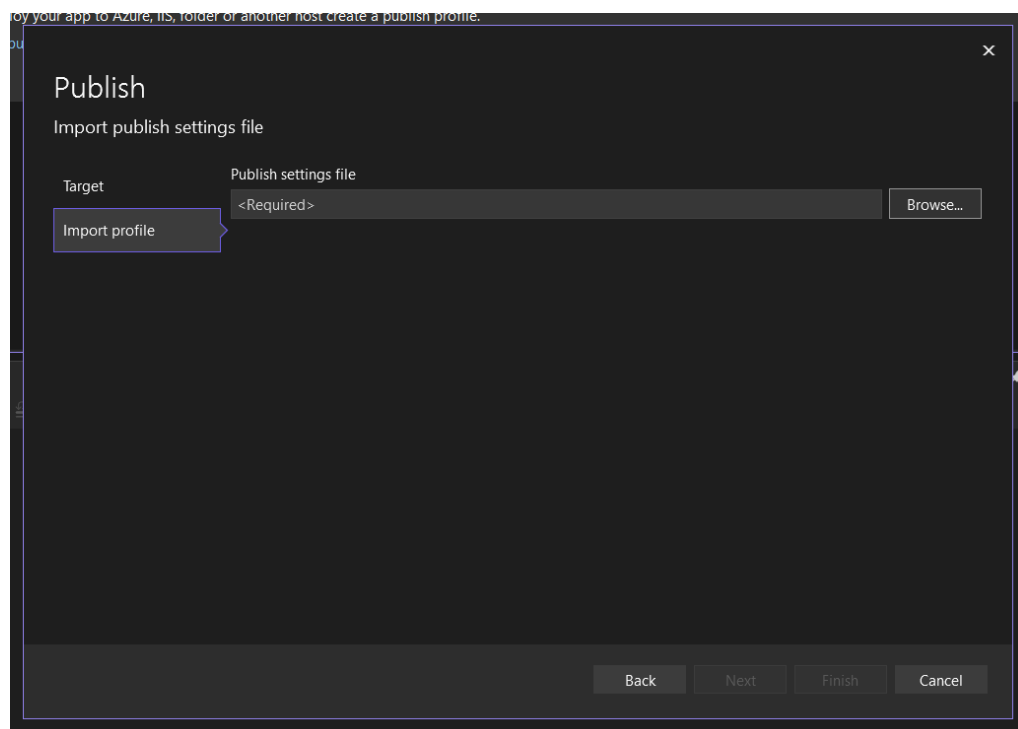

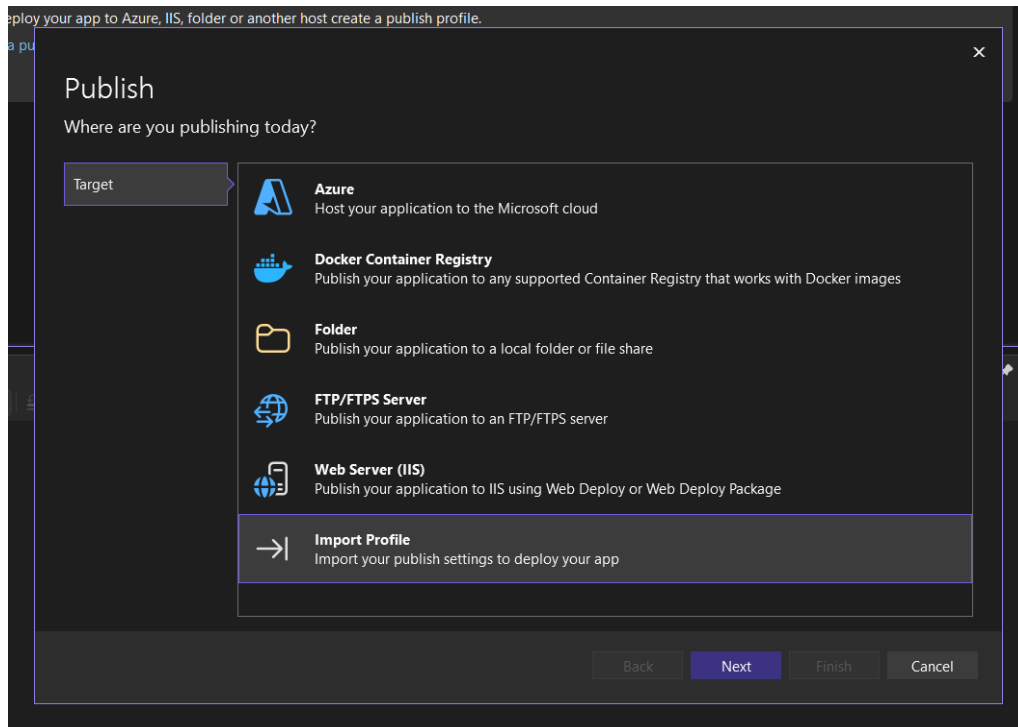

- Entre o seu Visual Studio e abra seu projeto.
- No seu projeto vá no **Gerenciador de soluções**(Solution Explorer).

- Clique com o botão direito do mouse sobre o nome do seu projeto (Ex: ApiRestMovies) e aperte em **Publish**.

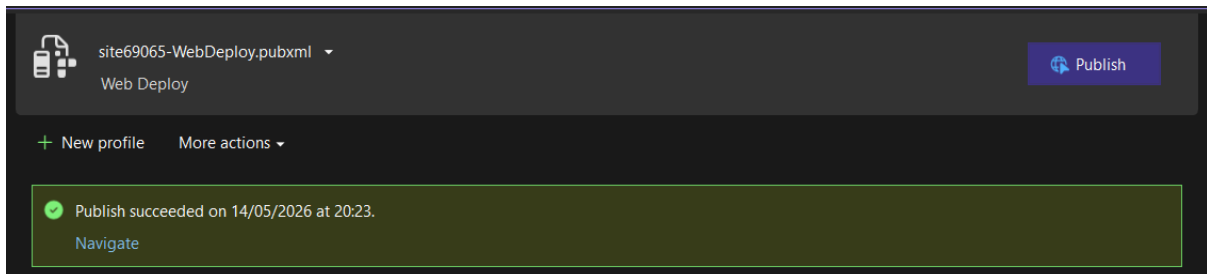

- Clique em **Importar Profile** e selecione o arquivo **.publishSettings** em suas pastas.

- Depois que o arquivo for importado, vai carregar todas as informações sobre ele, e aparecer essa tela, clique em **Publish**(Publicar).

- Após isso o Visual Studio vai compilar os código e enviar para os servidores dele, então você poderá visualizar o site, clicando no botão **Show Websites**.
